Aggie Coding Club
Tamu HACK

PROJECTS

About Me Website

- Used React language to code a personal website during Paycom workshop.
- Supports links to social media, resume, and another website page.

Motion Sensing Interactive Game

- Uses opencv with C++ to detect body movements including jumping, crouching, and walking.
- An interactive game where the game character replicates your movements.

WORK EXPERIENCE

LG Electronics Fort Worth, TX
Quality Assurance Managing Assistant

Winter 2020 – Summer 2021

- Audited assembly lines to evaluate proper and safe working environments
- Promptly updated the company's website with statistics from received invoices and emails
- Identified unsatisfactory products and communicated its potential causes and effects with the team
